All Evergreens are Moss Balled

All Evergreens are taken up expertly to secure the tender roots, the soil removed, and then the roots dipped in Transplantone and balled and burlapped in wet moss. By this method we are now able to eliminate 50 to 60 pounds of soil, making low cost express shipments possible. This method also insures excellent growth and quicker root action. In planting remove burlap and use peat moss in hole around roots.

Gentlemen:

I wish to advise the stock sent me was received in excellent condition and was planted at once. You can be assured I will not hesitate to recommend your Nursery at every opportunity.

Nov. 5, 1943

Gentlemen:

The shipment of Giant pear trees and Bearing age apple trees arrived, and I must say they are very fine stock. As you know, these trees are government inspected on arrival, and the government inspector, of many years experience, remarked that they were the finest stock he has ever been called upon to inspect.

I thought you would like to know this.

Yours very truly,

J.B. Ciceri

Gentlemen:

Thanks for your letter of May 7th. I am sorry that I bothered you about delivery date, as the package came in the following day.

I want you to know that I am very happy with all of the items that we had ordered. I was surprised to find that you could supply us with such wonderful root growth. If the stock does not do well, it certainly will not be your fault, as everything was in perfect shape. The roots were still moist, when the package arrived by express. I expect to order more from you next year.

Yours very truly,

Gentlemen:

Just a month ago I received a small order of dwarf trees from you and I can say without reservation they are the finest I have ever seen from any source. They are well selected and were in such fine growing condition, they are now in leaf and one had two bunches of bloom and another four. It is a real source of satisfaction to receive stock like that.

Very truly yours,

Leading Dwarf Apple Trees

These trees are not new with us. Some 15 odd years ago we started growing them from Malling stock secured from the N. Y. State Experiment Station. We offered them for sale, the first of their kind to be sold in the United States. Today they are a vastly improved "baby" tree, which bears the regular "daddy" size fruit. It is without question the "perfect" tree for the lawn or garden. We offer 3 types to suit your particular needs. We recommend them highly, without reservation. Be sure to plant them so that the bud union is at least 2 inches above ground.

DWARF APPLE TREES

2 yr., large, 3 to 4 ft., \$3.50 each; 3 for \$9.75.
